

ASSOCIATION OF ENERGY ENGINEERS

ANNUAL CHAPTER LEADERSHIP MEETING

Each year AEE holds a Chapter Leadership Meeting the day prior to the opening of **AEE World**.

In 2020, this meeting will be held Tuesday, September 22, at the Colorado Convention Center in Denver, Colorado.

All chapter members are welcome. The program, which is two to three hours in length, follows this general schedule:

Reports from Regional Vice Presidents and Assistant Directors of International Member Development on Status of Chapters in Their Regions - The first hour of the Chapter Leadership Meeting overlaps the last hour of the Executive Committee Meeting. This enables both groups to hear reports from the Vice Presidents of each U.S. Region and the Assistant Directors for each of the International Regions.

Old and New Business - Information is passed along that chapters need to operate successfully. New Chapters are recognized.

Chapter Leadership Forum - The forum panel is composed of individuals with significant experience in leading chapters, some of long duration, some with more recent experience in setting up a chapter. All have good ideas they are happy to share. The forum provides chapter officers the opportunity to ask questions about how other chapters have handled various situations, about where they've had success and where not, and to tell of their experiences with their own chapters.

Presentation of the Year's Chapter Recognition Awards - Awards are handed out in each of these categories in the National Division and the International Division: Best Newsletter, Best Website, Best Chapter Meeting, Best Community Service, Best Student Chapter Support, and Best Overall Chapter Performance, with \$1,000 cash awards for the winners in the Best Overall Chapter Performance category in each Division.

This meeting is an excellent opportunity for chapter members to meet and network with others from around the world who share their interests in AEE and its chapters as well as their own professions and careers. Many lifelong associations have begun at these meetings during AEE's 42-year history.
