

# Reduced Subscription Rates for AEE Members!

The **International Journal of Green Energy** focuses on the forms and utilizations of energy that have minimal or reduced impact on the environment and society. Emphasis is placed on energy diversity, energy localization, energy security, and sustainable development.

The **International Journal of Green Energy** provides a multidisciplinary international forum for the rapid dissemination of the latest high-quality research results in the fields of energy research, management, and conservation, especially advanced environmentally friendly energy technologies. It provides a medium for the free exchange and discussion of ideas and information, and a record of knowledge generated and technology know-how.

## Editor-in-Chief

**Xianguo Li**

*Department of  
Mechanical Engineering  
University of Waterloo*

**Members of *The Association of Energy Engineers* are eligible to receive a discounted journal subscription for \$59.75.**
