We Are AEE

Over 18,000 professionals in over 100 countries trust the Association of Energy Engineers (AEE) to promote the interests of those engaged in the energy industry and to foster action for sustainable development. Our members operate in the dynamic fields of energy engineering, energy management, renewable and alternative energy, power generation, energy services, sustainability, and all related areas. We provide members a framework within which they can network and grow — by staying abreast of the latest industry trends, and by acquiring the tools and training they need to maintain a competitive edge.

It’s Who We Are!

Don’t have a chapter close by? Establish a chapter in your area!

aeecenter.org
Get Involved & Grow

AEE encourages you to get involved at your local level. We currently have over 60 chapters in the U.S., over 40 international chapters, seven CWEEL chapters and over 20 student chapters that offer unique opportunities for energy professionals to share ideas and develop their careers, as well as participate in the energy industry. AEE divisions provide members access to a specific industry group that helps shape future developments in their area of focus.

It’s How We Connect!
AEE members create a global network across the entire energy supply chain, including energy suppliers and energy users, and are found in every trade, from business, hospitality and retail, to government, healthcare and academia. Many are deeply involved in manufacturing and energy related services, often developing new technologies and products that improve energy usage and span the gap between supply and demand. Others manage buildings and large facilities to ensure they are operating as efficiently as possible. Members are also hands-on in energy legislation, shaping new ways to achieve a more sustainable world.

It’s What We Do!

AEE Foundation

The AEE Foundation Scholarship program was established to encourage qualified practitioners in energy engineering and energy management to further education in these fields by awarding scholarships. To date, the Foundation has awarded over $908,000 in funds for use by over 1,500 outstanding students.

Scholarships are available to candidates obtaining their undergraduate or graduate degrees who are enrolled in an accredited college or university focusing on energy engineering or energy management.
Get Certified & Excel

AEE has been at the forefront of energy management and energy efficiency for over 40 years. We have implemented energy certification programs that have helped more than 30,000 professionals gain recognition for their technical knowledge and industry expertise. That’s because our programs are defined by industry experts, and recognized globally by local, state and federal governments, as well as by Fortune 1000 companies, corporations, utilities, energy service companies, and business professionals and engineers like you.

Network & Connect

AEE presents annual industry anticipated events that allow attendees the opportunity to learn, network and connect. Each conference includes technical presentations on the real issues and marketplace developments that impact your daily decisions. Our events attract keynote speakers that are the “Stars of Energy” and some of the highest level policy makers and environmental leaders. By becoming a part of AEE and participating in our network, conferences, seminars, chapter events, and expos, you’ll benefit from early exposure to the new and innovative ideas, technologies and services in the industry.
Become a Member

When you join AEE you gain access to a wide variety of member benefits, including discounts on US training programs and books, subscriptions to leading-edge technical publications, discounts on professional services, as well as industry networking opportunities. You also gain access to vital industry–specific information that keeps you fully informed, while participating in an organization that recognizes outstanding professional achievement.

In today’s competitive business environment, progressive organizations show their leadership through commitment to energy conservation and sustainability strategies. If you belong to such a company, then investing in a corporate AEE membership will provide positive exposure and help differentiate your brand. Also, the individual benefits and resources your team gains will help promote professional excellence and customer affinity.

“Our goal is to provide a framework within which you can network, promote the interest of those engaged in the energy industry, stay abreast of the latest industry trends, and acquire the tools and training you need to maintain a competitive edge.”

Albert Thumann, Founder, Association of Energy Engineers
Connect with your peers, support your industry, and promote your business by pledging to join the Association of Energy Engineers today.
