Get Involved

AEE encourages you to get involved at your local level. Our global network of chapters offers unique opportunities for energy professionals to share ideas and develop their careers, as well as participate in the energy industry.

We Are AEE

The Association of Energy Engineers (AEE) promotes the interests of those engaged in the energy industry and fosters action for sustainable development. Our members operate in the dynamic fields of energy engineering, energy management, renewable and alternative energy, power generation, energy services, sustainability, and all related areas. We provide members a framework within which they can network and grow — by staying abreast of the latest industry trends, and by acquiring the tools and training they need to maintain a competitive edge.

It's **Who We Are!**

aeecenter.org

Engineering the Future of Energy

AEE members create a global network across the entire energy supply chain, including energy suppliers and energy users. They are found in every business sector, from business, hospitality, and retail, to government and health care. Many are deeply involved in manufacturing and energy-related services, often developing new technologies and products that improve energy usage and span the gap between supply and demand. Others manage buildings and large facilities to ensure they are operating as efficiently as possible.

It's What We Do!

aeecenter.org

Investing In Our **Future**

AEE is involved with assisting and developing the next generation of energy engineers. Students and young professionals that when working together, can drive change and make a difference in our future.

Student Chapters

As a student, you are also able to join one of AEE's many student chapters located on campuses worldwide. Chapters are the "go-to" organization for students to share information, experiences, and objectives alongside their peers. AEE student members that go on to become certified professionals are sought after by leading technology companies for their application knowledge, attitude, and commitment.

Foundation Scholarship

The AEE Foundation Scholarship program encourages students to develop their career in energy engineering and energy management. To date, the Foundation has awarded over \$1.2 million in funds for use by over 1,840 qualified candidates.

Become a **Member**

When you join AEE you gain access to a wide variety of member benefits, including discounts on US training programs, subscriptions to technical publications, discounts on professional services, as well as industry networking opportunities. You also gain access to vital industry-specific information that keeps you fully informed, while participating in an organization that recognizes outstanding professional achievement.

Corporate Membership

In today's competitive business environment, progressive organizations show their leadership through a commitment to energy conservation and sustainability strategies. If you belong to such a company, then investing in a corporate AEE membership will provide positive exposure and help differentiate your brand. Also, the individual benefits and resources your team gains will help promote professional excellence and customer affinity.

It's **How We Help!**

Your Member Benefits

- » Access to monthly webinars presented by leaders and power players in the energy industry.
- » Discounted subscriptions and purchases to over 200 technical reference books
- » Discounts on AEE Energy Conference & Expo events
- » Access to local chapter networking opportunities
- » Access to keynote speeches and conference proceedings
- » VIP discounts on US training programs
- » Access to educational resources and publications
- » Free subscriptions to industry magazines
- » AEE's energy industry newsletters and journals
- » Access to scholarships for undergraduates and graduates
- » Participation in member recognition and award programs
- » Participation in and access to AEE's annual "state-of-the-industry" survey

Kick-start **Your Career**

MEMBERSHIP

Get Certified & Excel

AEE has been at the forefront of energy management and energy efficiency for over 40 years. We have implemented energy certification programs that have helped more than 32,000 professionals gain recognition for their technical knowledge and industry expertise. That's because our programs are defined by industry experts, and recognized globally by local, state and federal governments, as well as by Fortune 1000 companies, corporations, utilities, energy service companies, and business professionals and engineers like you.

 **Get Certified**

Accredited & Recognized

The Certified Energy Manager® (CEM®) and Certified Energy Auditor® (CEA®) programs are accredited by the ANSI National Accreditation Board (ANAB) based on the International Standard ANAB/ISO/IEC 17024 and by Entidad Nacional de Acreditación (ENAC) based on the international standard UNE-IN/ISO/IEC 17024. They are also U.S. Department of Energy Better Buildings Workforce Guidelines Recognized Programs. Cities, states, countries, and organizations worldwide, such as the American Institute of Architects, the Building Owners and Manager Institute, and the U.S. Green Building Council also recognize AEE certification programs.

Available Training Programs

- » Certified Energy Manager Training Programs
- » Certified Energy Auditor Training Program
- » Certified Carbon Auditing Professional Training Program
- » Annual Update for Certified Energy Managers
- » Certified Water Efficiency Professional Training Program
- » Certified Lighting Efficiency Professional Training Program
- » Certified Renewable Energy Professional Training Program
- » Certified Energy Procurement Professional Training Program
- » Certified Measurement & Verification Professional Training Program
- » Certified Building Commissioning Professional Training Program
- » Energy Efficiency Practitioner Training Program

CERTIFICATION & EDUCATION

Network & Connect

We bring energy professionals together to learn about the latest energy-saving strategies, services, and technologies and deliver exceptional business and networking opportunities. We hosted GLOBALCON®, EMC® and WEEC® Energy Conferences and Expos.

Global Audience

Our events attract a global audience of professionals, each bringing their unique expertise and perspective to the table. Ranging from energy managers and consultants to sustainability officers, the diversity in our attendee base is a reflection of the broad scope and appeal of our conferences. These gatherings attract those from the commercial, industrial, and governmental sectors, making for enriching exchanges and a collective push towards a brighter energy future.

Earn CEU's

Held over multiple days, our conferences and events provide you with opportunities to learn, network and earn continuing education credits to help maintain your certification status.

Access to Innovation

Each conference includes technical presentations on real issues and marketplace developments that impact your daily decisions. Our events attract keynote speakers that are the "Stars of Energy" and some of the highest level policy makers and environmental leaders. By becoming a part of AEE and participating in our network, conferences, seminars, and expos, you'll benefit from early exposure to the new and innovative ideas, technologies and services in the industry.
